General Comment:

This is a follow-up final reclamation, good housekeeping and stormwater inspection. Any corrective action(s) from previous inspections that have not been addressed are still applicable.

LocationOverall Good: ☐

Emergency Contact Number:

Comment: Corrective Action: Date: **Good Housekeeping:**

Type	WEEDS		
Comment:	Previous inspections documented noxious weed issues on location and required weed management to be conducted on location and the adjacent lands where weeds have encroached from Foundation's location. Due to the timing of this inspection, any viable noxious weeds remaining on location and adjacent lands will have gone into winter dormancy. The corrective action requiring ongoing weed management and monitoring will remain applicable until a follow-up inspection to determine compliance is conducted in the 2019 growing season.		
Corrective Action:	Properly remove and control noxious weeds on location. Properly manage and remove noxious weeds from the adjacent lands that have encroached from Foundations location. Ongoing weed management and monitoring is required, and needs to occur in accordance to COGCC rules and regulations.		Date: <input type="text"/>

Comment: Inspection #682503847 documented that the location/facility no longer appears to be active, and required final reclamation activities to be conducted. Unable to find evidence that final reclamation has been conducted in accordance with 1004 rules; Oil and gas facilities/equipment/trash debris remains on location. Abandoned risers have not been removed, access road remains. Compaction alleviation and revegetation activities have not been conducted. Original corrective action and date remains applicable.

Corrective Action:	Perform final reclamation in accordance with COGCC rule 1004.a; remove all equipment, risers, trash debris and remaining facilities on location and establish vegetation with total perennial, non-invasive uniform plant cover of at least eighty (80) percent of pre-disturbance or reference area levels. Use a seed mixture requested by the surface owner, or a mixture prescribed by the local county NRCS. Ensure erosion controls are implemented to stabilize the seeded soil, and continue to monitor and manage this site until Final Reclamation has passed. Revegetation activities shall be completed no later than 12/17/2018.	Date	12/17/2018
