General Comment:

This is an orphaned well inspection. Inspection completed to document progress and completion of well plugging and abandonment. Inspection may also identify possible task required for final closure/release of location from the Orphaned Well Program.

With no current operator task will be prioritized and completed as part of well abandonment process.

See link at end of report for path to downloadable pictures.

Idle Well

Purpose: Shut In Temporarily Abandoned Reminder: _____

Comment: Well status was reported as plugged and abandoned. Well was found to be in use supplying gas to residence and damaged to 2" flowline. Well was SI by Inspector to complete flowline abandonment 12/18/2018. Well is to be P&A by Orphaned Well Program.

Corrective Action: _____ Date: _____

COGCC Comments

Comment	User	Date
Contractor excavated and benched N side of WH to allow for casing access. The S side of wellhead was filled and compacted to allow placement of balance beam for rig. Excell Energy Services Rig 9 was spotted in and rigged up over well. Pressure gauge indicates well has 140 psig of pressure. Transfer pump was plumbed into wellhead and 78 BBLs of treated KCL water was pumped down well bore to kill well. Remaining pressure was bleed to tank and gas was dissipated using gas buster. Pressure at well dropped to 0 psig and no additional pressure recovered at casing. Well determined to be killed and under control. Welder cut off wellhead and welded a 4" swedge to the casing to allow installation of BOP. Rig crew installed BOP on modified casing, rigged in air trailer and closed rams on BOP. Manual well control was established at 4:40 pm. Location was secured and operations SDFN.	stjohnw	12/20/2018
