**General Comment:**

This is an interim reclamation and stormwater inspection. Location is shared between BP America and Logos Operating. It is the responsibility of both operators to coordinate and ensure compliance with reclamation regulations.

**Reclamation - Storm Water - Pit****Interim Reclamation:**

Date Interim Reclamation Started: \_\_\_\_\_ Date Interim Reclamation Completed: \_\_\_\_\_

Land Use: \_\_\_\_\_

Comment: Project area is surrounded by pinyon juniper woodland. An irrigation ditch flows adjacent to the western edge of the well pad. Poor revegetation observed on cut and fill slopes. Revegetation needs to be installed in areas with poor revegetation and areas requiring significant weed control. Areas with bare soils need seeding by April 15, 2019.

VEGETATIVE COVER \_\_\_\_\_

1003 f. Weeds Noxious weeds? F

Comment

Thousands of Russian knapweeds observed within the northwestern and southern project area. Two mature salt cedar trees growing on the cut-slope and southwestern project area. Approximately 500 Scotch and Canada thistles growing within the eastern project area.

Corrective Action

A long term weed control plan needs to be implemented in 2019. Multiple control methods and subsequent treatments are likely needed. Recommend contacting La Plata County weed control specialist for suggestions to manage infestations. Control weeds at the appropriate time but no later than June 1, 2019.

**Storm Water:**

Loc Erosion BMPs	BMP Maintenance	Lease Road Erosion BMPs	Lease BMP Maintenance	Chemical BMPs	Chemical BMP Maintenance	Comment

  

Comment: Erosional rilling and channeling is occurring throughout the well pad cut and fill slopes. Two significant channels up to 6 feet wide and deep, within the western fill slope are eroding into an irrigation ditch. Sediment transport is observable. See attached photos.

Corrective Action: Stormwater controls and slope stabilization measures need to be installed to stabilize erosion on the well pad cut and fill slopes. Revegetation will help provide long term stabilization. Temporary erosion control measures such as natural fiber erosion control blankets, need to be installed until perennial vegetation is established.

Date: 02/15/2019

**Pits:**    ☒ NO SURFACE INDICATION OF PIT
