All-

09:48 on 1/18/2019 I contacted Annette Garrigues (970-618-3329) with Williams to get information of the above referenced incident. She was en-route to incident that is located approximately 5 miles up Parachute Creek along CR 215. All the information she had at this time is that a 16" water gathering line ruptured. It is my understanding that the 16" line is SI. She will be providing additional information once she assess the incident.

Steven and Richard- You may want to coordinate a joint inspection yet today.

Thanks
Alex
