**Operator Comments:**

ROBERT L. BAYLESS, PRODUCER IS INSTALLING A COMBUSTOR PER FIELD INSPECTION 689801647.

Per Rule 912 for Venting/Flaring:

1. Estimated volume (12 mcf) and content of gas flared. See attached "Gas Prod test meter" data.
2. Gas analysis including H<sub>2</sub>S. See attached "Gas Analysis" showing zero H<sub>2</sub>S.
3. The well is not hooked up to gas line because of lack of infrastructure and not economical to put a line there. See attached "Economics" memo to our well file.
4. We do comply with rule 805.b.(1) – health, aesthetics, noise
5. We will use a CDPHE approved flaring method. We have purchased a combustor and auto-igniter and are waiting on weather to clear up to install. We have BLM approval to put a line above ground. Please see attached BLM Sundry.

We have been reporting the 12 mcf on the Form 7 every month as we have been flaring to a pit. Per the Field Inspection, we would like to install the combustor as soon as weather allows.

I hereby certify all statements made in this form are, to the best of my knowledge, true, correct, and complete.
