INITIAL ACTION SUMMARY

Description of initial action or emergency response measures take to abate, investigate, and/or remediate impacts associated with E&P Waste.

A partially buried 100 bbl produced water tank was removed during P&A activities. Following removal of the water tank, On October 12, 2018, each side wall of the tank grave was screened for VOC concentration using a PID detector and observed for potential petroleum hydrocarbon impact such as staining and/or odor. One grab soil sample (Side Wall 01) was collected from the sidewall exhibiting the highest VOC concentration and/or greatest evidence of potential hydrocarbon impact from a depth of 3' below grade. Additionally, one grab soil sample (Floor Sample 01) was collected from the floor of the tank grave at 5' below grade. Samples were collected per USEPA methods and strict chain-of-custody standards were followed. The soil samples were submitted to an accredited lab for analysis of benzene, toluene, ethylbenzene, and xylene (BTEX), and total petroleum hydrocarbons (TPH)-gasoline range organic (GRO) by USEPA 8260C, TPH-diesel range organics (DRO) by USPEA Method 8015C. The floor soil sample (Floor Sample 01) was also submitted for analysis of pH by USEPA Method 9045D, specific conductance (EC) by USEPA Method 9050A, and sodium adsorption ration (SAR) by USDA Agricultural Handbook 60 method (20B).

Groundwater was not observed in the open tank grave.

Environmental	The COGCC has reviewed the NFA request for Project/Remediation #11584. Based on the information presented, no further action is necessary at this time. However, should future conditions at the site indicate contaminant concentrations in soils or groundwater exceeding COGCC standards then further investigation and/or remediation activities may be required at the site. For locations with active ongoing oil and gas operations, comply with Rule 1003 interim reclamation requirements and for locations that will no longer have active oil and gas operations, comply with Rule 1004 Final Reclamation requirements.	01/23/2019
