**General Comment:**

Routine Inspection of new tank battery, etc. (10 days since beginning sales), old tanks (8 tanks in containment east of new tanks and 1-500 BBL produced water tank for compressor on north side of location in earth containment) are not included in this inspection. Wild Horse and Powell wells had Form 4s VENT\_FLARE that were last submitted and approved on 1/9/2018. They need to be submitted annually and the newly drilled wells need these Form 4s also.
