Sarah,

I have reviewed the referenced Form 2A Oil & Gas Location Assessment and have the following comments.

- 1) The Facilities section and the Multi-Well Plan indicate this proposed Oil & Gas Location will have nine (9) wells on it. However, the Location Drawing only depicts eight (8) wells. It appears the Avignon 8-67-32-31 well was not included on the Location Drawing. Please send me a revise Location Drawing showing all nine proposed wells and I will swap it out on the Form 2A.
- 2) In the Construction section Enerplus Resources has indicated the estimated post-construction ground elevation is 4,179 feet ASL. Given that the existing ground elevation for this proposed Oil & Gas Location is 5,177 feet ASL, I suspect the post-construction elevation of 4,179 feet is a typo. Perhaps you meant to indicate the post-construction elevation would be 5,179 feet ASL. Please confirm.

Please respond to this correspondence by March 4, 2019. If you have any questions , please let me know. Thank you.
