# GENERATOR'S EZ PROFILE™ ADDENDUM COLORADO EXPLORATION AND PRODUCTION WASTES

Profile Number: 12869500

## TENORM APPLICABILITY AND EVALUATION

**BACKGROUND:** On November 7, 2017 the Colorado Department of Public Health & Environment (CDPHE) issued a letter to address management of specific Exploration and Production (E&P) waste streams with the potential for high concentrations of TENORM. Effective as of the issue of the letter, the specific waste streams listed below are prohibited from disposal in all landfills in Colorado not specifically approved and designated to take them unless and until each waste is sampled and tested on a per shipment basis or in a representative and statistically valid manner consistent with the guidelines provided by CDPHE in Attachment B to the 11/07/17 and found to contain TENORM at levels less than the administrative release levels listed below.

**Applicable Waste Streams**

- Tank bottoms (solids and liquids)
- Filter socks
- Filter press cake or sludge
- Discarded pipe and flow line sections
- Residual materials dislodged during cleaning and maintenance activities on pipelines, flow lines, connector pipes, tanks and vessels

**Administrative Release Levels (after background levels subtracted):**

- Combined Radium 226 + Radium 228 must be less than 3 picocuries/gram (pCi/g)
- Natural Uranium must be less than 30 pCi/g
- Natural Thorium must be less than 3 pCi/g

**DIRECTIONS:** Please answer all waste characterization questions below. If the waste to be managed under this profile is one of the applicable waste streams listed above, please also provide a copy of applicable analytical. Note that for 'dynamic' wastes (see definition below), analytical will be required for each load and/or batch of waste.

WASTE CHARACTERIZATION	YES	NO
1. Does the waste to be included under this profile include any of the waste streams identified by CDPHE as having the potential for high concentrations of TENORM (see 'Applicable Waste Streams', above)? ➤ If 'NO', sign and certify below. No further action needed. ➤ If 'YES', complete questions 3 through 5 and provide copies of required analytical.		X
2. Are the radionuclide levels for the potential TENORM waste <u>less than</u> the Colorado Administrative Release Levels (see 'Administrative Release Levels', above), after subtraction of established background levels and following other characterization requirements in accordance with Attachment B of CDPHE's 11/07/17 letter?? ➤ If 'NO', waste cannot currently be accepted into any WM landfills in Colorado. Please see CDPHE's 11/07/17 letter for alternative disposal options. ➤ If 'YES', proceed to question 4.		
3. Is the waste a 'static' waste stream (e.g. waste streams that are a result of an essentially constant and consistent process where the input materials are of a consistent character and the output residuals are expected to have little variability)? ➤ If 'NO', please skip to Question 5. ➤ If 'YES', are the number of initial or periodic samples provided statistically significant in accordance with EPA Hazardous Waste Test Methods SW-846? <input type="checkbox"/> YES, samples provided are statistically significant. ➤ NOTE: If the samples provided are not statistically significant, then the waste cannot currently be accepted into any WM landfills in Colorado. Please see CDPHE's 11/07/17 letter for alternative disposal options.		
4. Is the waste a 'dynamic' waste stream (e.g. waste streams that are the result of a process that is inherently variable in terms of the inputs into and/or outputs out of the process) and samples provided are representative of the waste to be shipped? NOTE: Radionuclide analytical must be provided from representative samples of the waste for each load and/or batch for 'dynamic' waste streams. ➤ If 'NO', waste cannot currently be accepted into any WM landfills in Colorado. Please see CDPHE's 11/07/17 letter for alternative disposal options.		

**GENERATOR CERTIFICATION:** By signing this Generator's EZ Profile™ Addendum, I hereby certify that all information contained herein, and all attached documents, are a true, complete, and accurate description of the waste material being offered for disposal, and all necessary information has been provided to establish compliance with CDPHE's November 7, 2017 letter regarding acceptance of E&P waste streams with the potential for high concentrations of TENORM. All radionuclide analytical data provided was derived from sample(s) that were collected and analyzed in accordance with the requirements of Attachment B to CDPHE's November 7, 2017 letter. Any change in information regarding the nature or character of the material offered for disposal (i.e., changes in the process or new analytical data) will be identified by the Generator and will be disclosed to Waste Management prior to providing the material to Waste Management.
