Steven,

KPK disagrees with your analysis and plain misrepresentation of the facts in this matter. As such, KPK agrees with Ms. Oakman's interpretation of the law; the COGCC does not have the regulatory authority to require KPK to re-sample while your consultant is present. KPK is currently investigating the alleged contamination and KPK's facilities on the property in relationship thereto. In order to expedite the process, KPK collected the samples as soon as possible, in accordance with the approved Form 27 remediation workplan. Moreover, contrary to your assertion, KPK has not denied the landowner's requests to work together. Mere sampling does not amount to "field activities" that you requested KPK keep you apprised of, nor does unilateral sampling infer improper sampling procedure and testing. KPK will provide the results of the sampling as soon as they become available.

Sincerely,

Ross Watzman

Good morning Mr. Louis-Prescott,

The COGCC does not have the regulatory authority to require KPK to preform sampling while your consultant is present to observe their procedures. As always, we encourage operators and property owners to communicate and work together in an agreeable manner.

Per our letter dated 12/7/2018, we will provide you with an update once KPK has submitted their site investigation results.

Please let me know if you have any questions.

Kari Oakman

Subject: KPK Response to Contamination near Grant Tank Battery

Mr. Watzman,

Our firm represents BCL Colorado, LP, owner of the property upon which KPK's Grant Tank Battery and the contamination referenced in the attached letter is located. We understand that, pursuant to the Commission's directive, KPK is investigating the contamination and KPK's facilities on the property in relationship thereto. Please keep me apprised of KPK's investigation, so that BCL may have its environmental engineer on site for it as well.

Thank you,

Steven
