Comment Previous inspections required operator to conduct interim reclamation on areas not necessary for production operations. Interim reclamation activities appear to be in process, however seeding activities and stabilization/erosion controls do not yet appear to have been conducted/implemented. Corrective action and date will remain applicable until addressed in its entirety.

Corrective Action Perform reclamation in accordance to COGCC 1000 series reclamation rules and requirements; reclaim areas no longer needed for production operations and establish vegetation with total perennial, non-invasive uniform plant cover of at least eighty (80) percent of pre-disturbance or reference area levels. Use a seed mixture requested by the surface owner, or a mixture prescribed by the local county NRCS. Ensure erosion controls are implemented to stabilize the seeded soil, and continue to monitor and manage this site until Final Reclamation has passed. Reclamation activities shall be complete by 11/15/2018.

Date 11/15/2018
