OPERATOR COMMENTS AND SUBMITTAL

Comments

This well has a bottom-hole location beyond the unit boundary setback. The bottom of the completed interval will be within the unit boundary setback at 1910' FNL and 460' FEL of Section 4. The wellbore beyond the unit boundary setback will be physically isolated and will not be completed.

The surface owner has waived Rule 318A.a & Rule 318A.c within the Surface Use Agreement.

This application is in a Comprehensive Drilling Plan _____ No _____ CDP #: _____

Operator must have a valid water right or permit allowing for industrial use or purchased water from a seller that has a valid water right or permit allowing for industrial use, otherwise an application for a change in type of use is required under Colorado law. Operator must also use the water in the location set forth in the water right decree or well permit, otherwise an application for a change in place of use is required under Colorado law. Section 37-92-103(5), C.R.S. (2011).

Based on the information provided herein, this Application for Permit-to-Drill complies with COGCC Rules and applicable orders and is hereby approved.

Conditions Of Approval

All representations, stipulations and conditions of approval stated in the Form 2A for this location shall constitute representations, stipulations and conditions of approval for this Form 2 Permit-to-Drill and are enforceable to the same extent as all other representations, stipulations and conditions of approval stated in this Permit-to-Drill.

<u>COA Type</u>	<u>Description</u>
	Operator will ensure the wellbore beyond the unit boundary setback is physically isolated and is not completed. In the Operator Comments on the Form 5A the operator will (1) report the footages from the section lines of the bottom of the completed interval (2) describe how the wellbore beyond the unit boundary setback is physically isolated and (3) certify that none of the wellbore beyond the setback was completed.
	Operator acknowledges the proximity of the listed well. Operator agrees to: provide mitigation option 1 or 2 (per the DJ Basin Horizontal Offset Policy) to mitigate the situation, ensure all applicable documentation is submitted based on the selected mitigation option chosen, and submit a Form 42 ("OFFSET MITIGATION COMPLETED") stating that appropriate mitigation occurred and that it has been completed, prior to the hydraulic stimulation of this well. 05-123-07702, STEINWALD 29
	Bradenhead tests shall be performed according to the following schedule and the Form 17 submitted within 10 days of each test: 1) Within 60 days of rig release and prior to stimulation and 2) If a delayed completion, 6 months after rig release and prior to stimulation. 3) Within 30 days after first production, as reported on Form 5A. If a bradenhead test reports a surface casing pressure greater than 200 psig stimulation is not allowed until the Engineering Supervisor has been consulted. 1) Submit Form 42 electronically to COGCC 48 hours prior to MIRU (spud notice) for the first well activity with a rig on the pad and provide 48 hour spud notice via Form 42 for all subsequent wells drilled on the pad. 2) Comply with Rule 317.j. and provide cement coverage from end of 7-inch casing to a minimum of 200' above Niobrara. Verify coverage with cement bond log.

Best Management Practices

<u>No</u>	<u>BMP/COA Type</u>	<u>Description</u>
1	Drilling/Completion Operations	BBC will adhere to the COGCC Policy for Bradenhead Monitoring effective 5/29/12.
2	Drilling/Completion Operations	One of the first wells drilled on the pad will be logged with open-hole Resistivity Log and Gamma Ray Log from the kick-off point into the surface casing. All wells on the pad will have a cement bond log with gamma-ray run on production casing (or on intermediate casing if production liner is run) into the surface casing. The horizontal portion of every well will be logged with a measured-while-drilling gamma-ray log. The Form 5, Completion Report, for each well on the pad will list all logs run and have those logs attached. The Form 5 for a well without open-hole logs shall clearly state "No open-hole logs were run" and shall clearly identify (by API#, well name & number) the well in which open-hole logs were run.

General Comments

<u>User Group</u>	<u>Comment</u>	<u>Comment Date</u>
Permit	Permitting review complete, passed Final Review.	02/04/2019
Permit	Corrected Elevation to reflect Well Location Plat. Corrected operator comment for drilling beyond setback to standard language. Deleted Date of Rule 305.a.(1) Urban Mitigation Area Notification to Local Government. APD not in Urban Mitigation Area.	02/04/2019
Engineer	Corrected distance from the proposed wellbore to nearest existing or proposed wellbore belonging to another operator, including plugged wells, in accordance with email from operator. Operator indicated oil-based drilling fluid will not be used. Updated surface casing setting depth per email from operator.	01/28/2019
Engineer	Emailed operator- There is a water well within one mile that is 1,020' deep, additionally, DWR's aquifer determination tool lists the depth of the Laramie-Fox Hills at 1,065'. The proposed surface casing is too shallow and does not provide aquifer isolation and protection as required	05/23/2018
Engineer	Emailed operator- Please review distance from the proposed wellbores (document numbers 401485097, 401485170, 401485276, 401485206 and 401485297) to the nearest existing or proposed wellbore belonging to another operator, including plugged wells. It was indicated on the forms that there is not another well belonging to another operator within 1500' but based on a quick view of COGCC's map that is incorrect. There are several other wells that enter within 1500' of the proposed wells. If you have anti-collision reports that supposed the other wells being over 1500' away from the proposed well please send me those reports.	05/17/2018
Permit	Status Pending - contacted operator for the following corrections: - revise comment on Submit tab for BHL beyond the unit setback; COGCC will provide guidance. - revise comment for exception location waiver in SUA; add page 3, section 8.	05/14/2018
Permit	Passed Completeness.	12/29/2017
Permit	Returned to draft for: - right to construct listed as "Surface Use Agreement", but missing Surface Use Agreement attachment - attachment "DRILLING PLAN" should be renamed to "DEVIATED DRILLING PLAN"	12/20/2017
