General Comment:

This was to be a Final Reclamation Inspection for Well API#103-40209, located in a City Park within the City Limits of Rangely. Scout card has Well Status of AL /Old Operators Status Unknown-9999. Six months of Operations Reports, with Barrels of Oil produced by Well #2; Operator Pleasant Valley Oil Corp are in Document files.

There is a Remediation Project #3661; Form 27 Doc#1433377 related to this site. F27(4/25/06) reports that this was a Historical Injection line leak; that White River was approximately 250 ft to the North; that Impacted soil & groundwater was being moved by Chevron to Chevron Land Farm; that Reclamation to be done by City of Rangely after clean-up is completed. There is No Closure of this Project. Environmental Supervisor Alex Fischer is following through with research.

Chevron Injection well API#103-05453, approximately 325 ft to the NW had Injection line leak in 1990. It is unclear if Well files are confused between the two Wells; if Subject Well is AL or PA. Follow Up Inspection will be conducted after snowmelt to determine if there is any evidence of the Well.
