As defined in COGCC 100-Series Rules

Describe what is known about the spill/release event (what happened -- including how it was stopped, contained, and recovered):

Bonanza creek personnel reported a suspicious looking fluid transport truck parked on a remote location. Later in the day personnel stopped at the location to investigate. Bonanza personnel observed tire tracks backed to the edge of the location and evidence of a fluid discharge off location into the adjacent grassland. Bonanza contacted the COGCC to verbally report the release. The Form 19 was not submitted immediately as Bonanza set up surveillance equipment to attempt to catch a subsequent event in progress. If caught, Bonanza would have asked the guilty party to report the release. Bonanza did not observe any additional discharge events and we are submitting a Form 19 to report the illegal discharge and begin cleanup of the release.

#### OPERATOR COMMENTS:

The depth to water is estimated due to a lack of static water levels surrounding the release points on COGIS.

The release dimensions provided are estimated to match the largest of the release footprints.

I hereby certify all statements made in this form are to the best of my knowledge true, correct, and complete.
