**General Comment:**

Flowline Spill Inspection. Operator notified inspector on 2/17/2019 of a flowline spill in the field between the Snyder 3 and the tank battery. Operator said that he also left messages with the landowner and COGCC EPS and will submit a Form 19I. A 17' section of flowline was removed with corrosion from the outside in and was replaced. See attached photos of cleanup. Well was shut in during this work and put back online after testing the flowline.
