General Comment:

This is an environmental inspection in response from two unofficial complainants. Complainants stated that Town of Rockvale water supply drainage is downstream from well pad and that a drainage near the well pad flows directly into the water supply drainage. Inspection of location found this to be the case (see attached photos) and that the operator was lacking any containment on the downslope (east) side of the well pad. Containment has since been installed in response to another COGCC inspection.

Form 2A states "With the use of this drilling system and the location at the edge of the mapped elk winter range CPW has agreed to a one time extension for the drilling operations through 15 January. The timing stipulation at this site for elk winter range will go into effect on 16 January 2019."

Operator states CPW has since granted another extension for drilling operations past Jan 16, 2019.
