CORRECTIVE ACTIONS:

1 CA# 122341

Corrective Action: Perform reclamation in accordance to COGCC 1004 reclamation rules and requirements. Remove the remaining equipment from the location. Reclaim the remaining access road. Establish vegetation with total perennial, non-invasive uniform plant cover of at least eighty (80) percent of reference area levels. Ensure erosion controls are implemented to stabilize the seeded soil. Operator shall continue to monitor and manage this site until the location meets Rule 1004 standards. Operator is directed to perform corrective actions outlined on this inspection report immediately. Doing so may decrease the duration of the alleged violations and the penalties that may be assessed pursuant to Rule 523.

Date of Completion: 02/14/2019

Operator  
Comment:

In response to the access road, the remaining section of road was historical. In reviewing the Soil Survey Maps of Southern Weld County, aerial image 1974, the road appears to be in place to cross the Sequine Draw (COGCC GIS Online) around the spud date of 1973. Due to this, a 502.b variance would not be required. APC did remove and reclaim an unused section of road per landowner request, as he had installed an alternate access road into the property.  
DCP has since placed a marker on site to locate an abandoned line.  
APC will continue to monitor and perform maintenance reclamation and weed control in order to establish vegetation requirements of 1004 Rules.

COGCC Decision: **Not Approved**

COGCC  
Representative:

The request is denied. A 502.b variance would be required if the access road was placed on location for the associated well production regardless of timeframe. If a photo can be supplied by the Operator showing that the road was in place before the well was developed (Pre 1973) a 502.b variance would then not be required.
