Zinc	23,000 mg/kg	51	52	71	44	56	51	59	40	53
DRO/GRO (Diesel Range Organics/Gasoline Range Organics)										
DRO/GRO	Combined TPH 500 (mg/kg)	4.5 DRO / 110 GRO	non-detect	non-detect	non-detect	non-detect	non-detect	31 DRO / 6,300 GRO	non-detect	33 DRO / 18 GRO

* Consideration shall be given to background levels in native soils and water. Samples in excavated area are more than three feet below the ground surface and will be covered by more than three feet of clean backfill, [FAQ-32](#).

** Compare elevated arsenic levels to background values, [FAQ-31](#). Naturally-occurring arsenic appears to be elevated in this location.

*** All values estimated based on conversion factor of 1.240 kg/l soil density, derived from NRCS bulk density soil map data. Sample results reported in mg/kg. Compare elevated boron levels to background values. Naturally-occurring boron appears to be elevated in this location. Area is not cropland, [FAQ-34](#).
