Jim:

I'm planning to address those this coming summer as revenues permit. The remediations took about half of last year's income so things are a little tight.

There was about 2 feet of snow on the ground earlier this week.

Thanks.

Todd

Todd,

Conor's e-mail was regarding the tank anchors and secondary containment berms.

How much snow is out there?

Thanks,

Jim Hughes

Jim:

We did the remediations needed during the fall. Since then, snow has fallen as per usual. I was there Monday and checked over things as best as possible given the snow depths. Everything looks good and I'm looking forward for the spring melt.

Thanks.

Todd

Todd,

What has occurred at these locations since last fall?

I will be out that way next week to re-inspect these locations.

Thanks,

Jim Hughes

Good morning,

I'm emailing to inquire about the status of the anchors on equipment on sites that you inspected last year. You told me (I believe via phone conversation) that they would comply. To remind, the locations inspected were:

007-06117

007-06253

007-06116

If you have any follow up, let me know.

Thanks!
