**Inspected Facilities:**

Facility ID	Type	Status	Status Date	Well Class	API Num	Facility Name	Insp Status
210087	WELL	PR	04/22/2003	OW	043-40024	ROB HIAWATHA 2	RI

**General Comment:**

[This is an interim reclamation and stormwater inspection.](#)

**Inspected Facilities**

Facility ID: 210087 Type: WELL API Number: 043-40024 Status: PR Insp. Status: RI

**Reclamation - Storm Water - Pit**

**Interim Reclamation:**

Date Interim Reclamation Started: \_\_\_\_\_ Date Interim Reclamation Completed: \_\_\_\_\_

Land Use: \_\_\_\_\_

Comment: Project area is surrounded by open pinyon juniper woodland and grassland. Revegetation is progressing within the majority of the interim reclamation areas. However, the northern project area is not stable. See details under stormwater below.

**Storm Water:**

Loc Erosion BMPs	BMP Maintenance	Lease Road Erosion BMPs	Lease BMP Maintenance	Chemical BMPs	Chemical BMP Maintenance	Comment

Comment: Erosional gullying is occurring directly downslope and adjacent to the well and appears to be migrating upstream toward the well. See attached photos.

Corrective Action: Stabilization measures and stormwater controls need to be installed to stabilize the bank of the erosional channel, and manage stormwater erosion within the project area. This needs to be an engineered long-term solution sufficient to stabilize the cut-bank, and address run-on and runoff issues with properly sized and installed stormwater and erosion controls.

Date: 04/12/2019

Pits:  NO SURFACE INDICATION OF PIT
