FIELD INSPECTION FORM

Loc ID 436291 Inspector Name: COSTA, RYAN On-Site Inspection 2A Doc Num: _____

Status Summary:

- THIS IS A FOLLOW UP INSPECTION
- FOLLOW UP INSPECTION REQUIRED
- NO FOLLOW UP INSPECTION REQUIRED

Operator Information:

OGCC Operator Number: 10496
Name of Operator: CRAZY 8 ENERGY LLC
Address: 9122 COUNTY ROAD HH
City: LAMAR State: CO Zip: 81052

Findings:

- 8 Number of Comments
- 4 Number of Corrective Actions
- Corrective Action Response Requested

ANY CORRECTIVE ACTION(S) FROM PREVIOUS INSPECTIONS THAT HAVE NOT BEEN ADDRESSED ARE STILL APPLICABLE

Complaint

Comment: [Complaint #200447053 - Colorado Division of Water Resource](#)
 Location: NE Q NE Q section 8 township 22S Range 58W. Location ID: 436291. API # 05-025-06020.
 Padilla #1, location ID 436291
 Issue: Two ponds remain after they drilled a well around the date of March 2014. The well has been plugged since but the two ponds remain. These ponds are pond pits and are not in compliance with our stock water pond descriptions. These ponds must be pumped out, drained and backfilled due to this area being in a drainage that is tributary to the Arkansas River. The west pond does not go dry and is probably receiving groundwater. The East pond is partially lined doesn't hold much water. All runoff and storm runoff currently run into these two ponds which needs to go back to the river. Even if Mr. Padilla would want these two ponds for stock watering, it would not qualify under the rules for a stock water pond. No headgate or dirt dam to release all water and drainage must be dry 80% of the time during the year. These two ponds are not in compliance with the groundwater rules of the Arkansas River Basin Rules.

Comment:

The two drilling pits have not been backfilled and reclaimed. One pit has torn pit liner debris that must be properly removed and disposed. Water remains in the pits and must be pumped out to sufficiently dry the pits. Pits will need to be closed and sampled per 900 series rules. There are ditches directed toward the pits that must be filled in. There is a lack of vegetation at the location and soils are susceptible to erosion. There are undesirable weeds throughout the location. All backfilling of pits, recontouring, soil decompaction, and reclamation must be completed by April 30, 2019. Corrective Action does not preclude from enforcement action.

COGCC Comments

Comment	User	Date
See Form 2A COA's: There was one pit lined however, the liner was torn and not maintained. The other pit did not appear to be lined. There were insufficient BMP's to protect the intermittent stream.	CostaR	03/12/2019
There was a dead cow in the north pit at the location.	CostaR	03/12/2019
