Description

Operator Comments:

Three wells, B-Farm LD 18-389HN (05-001-10262), B-Farm LD 18-390HN (05-001-10271) and B-Farm LD 18-391HNX (05-001-10258) have COA's for the Veal 14-6 (1) (05-001-09091) and the North Colorado Blvd 1 (05-001-07005) (note this API number on the COA was listed as the Zarlengo 1 well, but the API # from the North Colorado Blvd 1 well). Both of the COA'd wells are beyond the required 1500' of the wells currently drilled to be stimulated. We are requesting that for the stimulation of the above 3 wells, Great Western be allowed to use Option 4 of the Horizontal Offset Policy and actively monitor the Bradenhead of these two wells during the stimulation. GWOG operates the Veal well. The North Colorado Blvd well has been shut in since early 2014, and shows Energy Search as the operator. At this time, GWOG prefers not to shut in the Veal because it is a lease holding well by production. At the time that B-Farm wells further west in the section are drilled the COA's for these two wells will be addressed. To monitor the Bradenhead, GWOG will install temporary automation equipment prior to the stimulation and the Bradenhead will be actively monitored via SCADA until the stimulation is complete. If the Bradenhead encounters any changes according to the Bradenhead Monitoring Policy, stimulation operations will be stopped and the COGCC notified. This request is only for the 3 B-Farm wells listed above. At such time wells further west are drilled, the COA's will be addressed with Options 1, 2 or 3.

I hereby certify all statements made in this form are, to the best of my knowledge, true, correct, and complete.
