CORRECTIVE ACTIONS:

1 ☒ CA# 122083

Corrective Action: Per Rule 805.c., Operator shall control fugitive dust caused by their operations. The corrective date is the date the location was observed out of compliance, as the location should be in compliance at all times.

Date: 01/28/2019

Response: CA COMPLETED Date of Completion: 01/29/2019

Operator Comment: Following receipt of inspection report on 1/29/19, Nickel Road immediately had dirt work contractor onsite contact water truck company to ensure a water-truck was available on-call should pad and weather conditions warrant use. Water truck will remain on call throughout operations at the location. Additionally, the pad location surface was gravelled following the date of this inspection (gravelling complete on 2/8/19) and vehicle tracking control was installed (vehicle tracking install complete on 2/11/19) both assisting in the mitigation of dust conditions. Finally, Nickel Road has plans in place to hydroseed all slopes for stabilization and weed prevention purposes

during the Spring, 2019 growing season. Nickel Road has maintained compliance since the 1/28/19 inspection and will continue to maintain compliance with Rule 805.c.

COGCC Decision: Approved

COGCC Representative: Approved pending re-inspection of this FIR resolution acknowledges the document was received.

On February 21, 2019, Field Inspection Report Doc. #682404574 confirms the well pad has been stabilized with gravel, as stated in the Operator response comment.
