COMMENTS:

Whiting requests permission to temporarily abandon this well due to completion economics. Due to increased levels of production communication from high density pad drilling, completion has been delayed. When oil prices reach a level to meet a rate of return of 20% the well will be completed and produced. The well is closed to the atmosphere by cement at 15,809'(PBD) and a night cap with bull plug and needle valve at surface. The well was drilled in September 2016 and has not been stimulated/completed to date.

H2S REPORTING

Data Fields in this section are intended to document Sample and Location Data associated with the collection of a Gas Sample that is submitted for Laboratory Analysis.

Gas Analysis Report must be attached.

H2S Concentration: _____ in ppm (parts per million) Date of Measurement or Sample Collection _____

Description of Sample Point:

Absolute Open Flow Potential _____ in CFPD (cubic feet per day)

Description of Release Potential and Duration (If flow is not open to the atmosphere, identify the duration in which the container or pipeline would likely be opened for servicing operations.):

Distance to nearest occupied residence, school, church, park, school bus stop, place of business, or other areas where the public could reasonably be expected to frequent: _____

Distance to nearest Federal, State, County, or municipal road or highway owned and principally maintained for public use: _____
