## OPERATOR COMMENTS AND SUBMITTAL

### Comments

This Form 2A is a resubmittal of Document #401639665. Conoco Phillips Company has evaluated the potential for pad expansion at the adjacent pad (Location ID #451301) and determined that expanding it is not feasible for production facility placement. Conoco plans to drill 4 additional wells in the future and will amend this Form 2A upon submittal of those applications.

Storm Water Management Plan (SWMP) will be in place to address construction, drilling and operations associated with oil and gas development through the state of Colorado in accordance with CDPHE General Permit Rules.

Spill prevention control and countermeasure plan is in place to address construction, drilling and operations associated with oil and gas development throughout the state of Colorado in accordance with CFR 112.

It is the intent of the County that operators utilize closed-loop or modified closed-loop systems for drilling and completion operations in order to minimize or eliminate the need for earthen pits; however, notwithstanding the foregoing, where appropriate, and subject to prior County approval, the County generally supports: 1) the use of unlined drilling pits when bentonite or a similar clay additive is used during the drilling process, and 2) the use of lined single- or multi-well water storage pits in order to minimize the transport of water and promote recycling, subject to the requirements set forth in this subsection. Permitted modified closed-loop systems include oil and gas wells where air or fresh water is used to drill through the surface casing interval, defined as fifty (50) feet below the depth of the deepest aquifer, and a closed loop system is used for the remainder of the drilling and/or completion or recompletion procedures. Multi-well pits are defined as lined, engineered pits, constructed over an engineered base, with construction or liner specifications meeting or exceeding Commission pit lining rules, that will serve the functions of drilling, completion, and/or flowback pits for more than one well.

Reference area photos will be taken during the growing season and submitted within 12 months of receipt of the Form 2A.

I hereby certify that the statements made in this form are, to the best of my knowledge, true, correct and complete.
