## DESCRIPTION OF IMPACT

Impacted?	Impacted Media	Extent of Impact	How Determined
Yes	GROUNDWATER	Unknown	Lab Analysis
Yes	SOILS	Unknown	Lab Analysis

## INITIAL ACTION SUMMARY

Description of initial action or emergency response measures take to abate, investigate, and/or remediate impacts associated with E&P Waste.

KPK located the flowline closest to the sample collected by the complainant and drilled a boring to sample groundwater at 15' and soil at 17'. A sample for each was collected and tested for BTEX (water and soil) and TPH (soil). 6 additional 2" temporary piezometers will be drilled in order to collect samples and evaluate the current condition of the soil and groundwater. See proposed locations in map attached, which includes an upgradient piezometer. All piezometers will be marked. Field logs and soil description will be provided once the borings have been completed. Soil samples will be analyzed for BTEX and TPH. Groundwater, if encountered will be analyzed for BTEX, Sulfate, Chloride and TDS.

## PROPOSED SAMPLING PLAN

### Proposed Soil Sampling

☒ Will soil samples be collected as part of this investigation? ( Number, type (grab/composite), analyses, and locations of samples ):

Each temporary piezometer will have soil samples collected and analyzed for BTEX and TPH when drilled

### Proposed Groundwater Sampling

☒ Will groundwater samples be collected as part of this investigation? ( Number, analyses, and locations of samples ):

Each temporary piezometer will have groundwater samples, if available, collected and analyzed for BTEX, Sulfate, Chloride and TDS. when drilled

### Proposed Surface Water Sampling

☐ Will surface water samples be collected as part of this investigation? ( Number, analyses, and locations of samples ):

## Additional Investigative Actions

☐ Additional alternative investigative actions described in attached Site Investigation Plan ( summary ):

☐ Were background samples collected as part of this site investigation?

☐ Was investigation derived waste (IDW) generated as part of this investigation?

Volume of solid waste (cubic yards)          Volume of liquid waste (barrels)         

☒ Is further site investigation required?

Forensic soil analysis is being performed to further investigate the source of contamination. Results of the analysis and interpretation of results from the laboratory will be provided if conclusive that KPK is not responsible for discovered contamination. In which case a final closure request will be made through a supplemental Form 27.
