John and Doug

I know it is not required for our Golden Eagle 1-6 Pad since we submitted well before the February 14th date for cultural distances for school setbacks for this proposed pad location. However, SRC wanted to be proactive and get the information to you so you have it so that there would be no questions on school setbacks with this proposed location.

We met with both of you at end of January to discuss this pad, as the developer (surface owner) wants us in and out of this location. I attached a new cultural distance for the school setbacks that you can feel free to use if you would like for Document 401905856. The public comment period ends on 3.13.2019 for this 2A location, so we have some time until that has passed.

We stayed well over 5280 feet away from School Facility, School Property Line and Child Care Center as you can see below and attached document.

Anyhow I just wanted to share this ahead of time before you review this location 2A so that you had the information in hand incase Mr. Robbins wanted the details.

Have a good day!

Erin Ekblad

CULTURAL DISTANCE INFORMATION**SITE NAME: GOLDEN EAGLE 1-6 PAD**

MEASURED FROM REFERENCE WELL		
BUILDING:	635'	E

Erin,

I have reviewed the referenced Form 2A Oil & Gas Location Assessment and have the following comments.

1) In the Land Use section SRC Energy has indicated the Future Land Use is both Crop Land (Irrigated & Dry land) and Non-Crop Land (Rangeland). The Location Drawing indicates the Future Land Use will be Irrigated Crop Land. Given the overall general and predominate Land Use in this area is Crop Land, I'd like to change the Future Land Use to indicate Irrigated Crop Land only so as to avoid any confusion.

2) SRC Energy has provided an operator comment that indicates "*As discussed during the Planning Commission hearing, SRC will install landscaping and security fencing, following SRC's operations.*" The Rule 804 Visual Impacts BMP does not include discussion of the landscaping that SRC Energy has agreed to install. Please provide some additional language to be included in the Visual Impacts BMP that does discuss the landscaping.

Please respond to this correspondence by April 7, 2019. If you have any questions, please contact me. Thank you.

Doug

See below comments:

#1: After talking with the surface owner, we'll be planting a Native Dryland Seed Mix within the bermed area during interim-reclamation, as they will not be irrigating the interior area of the berm. Outside of the bermed area, on the south side, will most likely be irrigated crop. You may change number 1 to just Irrigated Crop Land.

#2: SRC and the Town of Severance have agreed that SRC will install a five (5) foot berm with trees and shrubbery on the North, West, and South sides of the Well Pad with six (6) foot chain link fencing around the wellheads. The Facility pad will also include a five (5) foot berm with trees and shrubbery on the North and West sides with six (6) foot chain link fencing on the North, South, East, and West sides of the facility.

Do you need anything else from SRC?

Erin

Erin,

Now that the Public Comment period has ended, please send me a letter certifying SRC Energy's compliance with COGCC Rule 306.e. If any meetings/consultations were requested, please also indicate their outcome. Thank you.

Doug

Attached the certification letter to the Director for Golden Eagle for Rule 306.e.

Please note we did not have any BU's request any meetings or consultations. However we did hold a neighborhood meeting on December 10, 2018 to be proactive and no one attended except SRC staff.

Sounds like we should be all set for Golden Eagle 1-6 Pad 2A to be approved. Let me know if you have any additional questions.
