Site Investigation and Remediation Workplan (Supplemental Form)

This form shall be submitted to the Director for approval prior to the initiation of site investigation and remediation activities. However, this shall not preclude the Operator from taking immediate action to protect public health or safety, the environment, wildlife, or livestock.

This Form 27 describes site conditions as currently understood by the Operator; approval of this Form 27 by COGCC is based on the site conditions accurately described herein; any changes in site conditions identified during or subsequent to the performance of the approved workplan may necessitate additional investigation or remediation which shall be described on a supplemental Form 27.

This Form 27 is intended to provide basic information regarding the proposed site investigation and remediation actions, but the workplan may be more fully described in attached documentation.

Refer to Rules 340, 905, 906, 907, 908, 909, and 910

## DESCRIPTION OF IMPACT

Impacted?	Impacted Media	Extent of Impact	How Determined
Yes	SOILS	380'x45'x1'deep	Physically measure and delineated via excavation
Yes	SURFACE WATER	3.6 miles	Visible sheen on Animas Ditch

## INITIAL ACTION SUMMARY

Description of initial action or emergency response measures take to abate, investigate, and/or remediate impacts associated with E&P Waste.

The water transference line was shut in and isolated. Booms were deployed along the Animas Ditch and High Flume Creek to collect light sheen. These booms were continuously monitored and changed daily. The water transfer line was excavated and impacted soils surrounding the release point were removed and transported off site for disposal. Fresh water was provided to livestock relying on the irrigation water as a drinking source.

## PROPOSED SAMPLING PLAN

### Proposed Soil Sampling

Will soil samples be collected as part of this investigation? ( Number, type (grab/composite), analyses, and locations of samples ):

Soil samples collected from the release point excavation area were composite samples. Composite samples collected from each sidewall and base of the excavation to be representative of the area. Failed samples were further excavated to meet cleanup criteria. The water to the Animas Ditch was shut off during the excavation activities to reduce risk of further impact and to ease crossing of the ditch.

Sampling of the ditch will be conducted pending agreement of access provided by the Citizens Animas Ditch board. BP has proposed to collect samples from various location of the ditch, from each property parcel or every quarter mile, whichever is more frequent. At each sample location, one, three point, composite sample would be collected from the upper ditch bank where water was flowing during the release and is identified as a potential impact zone. Similarly, at each sample point, one, three point, composite sample would be collected from the base of the canal. These samples would be

### Proposed Groundwater Sampling

Will groundwater samples be collected as part of this investigation? ( Number, analyses, and locations of samples ):

Groundwater samples collected from nearby domestic water wells as a precautionary measure. No significant threat to groundwater associated with the release.

### Proposed Surface Water Sampling

Will surface water samples be collected as part of this investigation? ( Number, analyses, and locations of samples ):

Water samples were collected along the Animas Ditch and High Flume Creek. Attached are the sample locations. Once water is returned to the ditch, water samples will be collected to ensure there is no impact above regulatory limit.

## Additional Investigative Actions

Additional alternative investigative actions described in attached Site Investigation Plan ( summary ):

The area of impact along the Animas Ditch banks and High Flume Creek were sprayed with a biodegradable surfactant to promote hydrocarbon degradation. The proposed sampling of the ditch will determine where and if any remedial action is required. Once access is granted, BP will perform sampling. Results will be shared to determine remedial action.

# SITE INVESTIGATION REPORT

## SAMPLE SUMMARY

### Soil

Number of soil samples collected 45  
Number of soil samples exceeding 910-1 3  
Was the areal and vertical extent of soil contamination delineated? Yes  
Approximate areal extent (square feet) 950

### NA / ND

-- Highest concentration of TPH (mg/kg) 1844.3  
-- Highest concentration of SAR 14.5  
BTEX > 910-1 No  
Vertical Extent > 910-1 (in feet) 3

### Groundwater

Number of groundwater samples collected 5  
Was extent of groundwater contaminated delineated? No  
Depth to groundwater (below ground surface, in feet) 15'  
Number of groundwater monitoring wells installed 0  
Number of groundwater samples exceeding 910-1 0

-- Highest concentration of Benzene (µg/l) 5E-05  
-- Highest concentration of Toluene (µg/l) 5E-06  
NA Highest concentration of Ethylbenzene (µg/l) \_\_\_\_\_  
NA Highest concentration of Xylene (µg/l) \_\_\_\_\_  
NA Highest concentration of Methane (mg/l) \_\_\_\_\_

### Surface Water

28 Number of surface water samples collected  
0 Number of surface water samples exceeding 910-1

If surface water is impacted, other agency notification may be required.

## OTHER INVESTIGATION INFORMATION

Were impacts to adjacent property or offsite impacts identified?

Surface water impacts to Animas Ditch. No water quality exceeded COGCC Standards. Domestic water wells sampled as groundwater indicate one well has elevated benzene and toluene, but is not related to this release. BP will investigate to determine if well is influenced by production wells in the area.

Were background samples collected as part of this site investigation?

Upstream water sample from the Animas Ditch and background soil samples. Background soil samples were also collected during the excavation activities.

Was investigation derived waste (IDW) generated as part of this investigation?

Volume of solid waste (cubic yards) 282 Volume of liquid waste (barrels) 0

Is further site investigation required?

BP has proposed to collect samples from various location of the ditch, from each property parcel or every quarter mile, whichever is more frequent. At each sample location, one, three point, composite sample would be collected from the upper ditch bank where water was flowing during the release and is identified as a potential impact zone. Similarly, at each sample point, one, three point, composite sample would be collected from the base of the canal. These samples would be submitted for laboratory analysis of TPH and volatile organics.

Follow up sampling, following the return of water to the Animas Ditch, to determine if further action is required.

# REMEDIAL ACTION PLAN

Does this Supplemental Form 27A include changes to a previously approved Remedial Action Plan? No \_\_\_\_\_

## SOURCE REMOVAL SUMMARY

Describe how source is to be removed.

The area of soil contamination was excavated and confirmed below standard with confirmation sampling. The residual impacts along the Animas Ditch bank and High Flume Creek have been sprayed with a biodegradable surfactant the proposed sampling plan will determine the effectiveness of the application and will also determine if and where remedial activities are required.

## REMEDIATION SUMMARY

Describe how remediation of existing impacts to soil and groundwater is to be accomplished (i.e. summarize remedial action plan). Provide a brief narrative description including: technical justification, schedule for implementation, estimated time to attain NFA status, plus plans and specifications for the selected remedial action technology.

Soil remediation at the release point has been completed and confirmed no further action is necessary. BP proposed sampling of the irrigation canal will determine if and where remedial actions will be required. The results of the proposed sampling plan will be analyzed and shared to determine the remedial course of action if necessary.

The sampling of the canal is contingent on an access agreement to be approved by the Citizens Animas Ditch company.

## Soil Remediation Summary

In Situ

Ex Situ

- \_\_\_\_\_ Bioremediation ( or enhanced bioremediation )
- \_\_\_\_\_ Chemical oxidation
- \_\_\_\_\_ Air sparge / Soil vapor extraction
- \_\_\_\_\_ Natural Attenuation
- Yes \_\_\_\_\_ Other Promoted hydrocarbon degradation via application of biodegradable surfactant.

- Yes \_\_\_\_\_ Excavate and offsite disposal
- \_\_\_\_\_ If Yes: Estimated Volume (Cubic Yards) \_\_\_\_\_ 282
- \_\_\_\_\_ Name of Licensed Disposal Facility or COGCC Facility ID # \_\_\_\_\_
- \_\_\_\_\_ Excavate and onsite remediation
- \_\_\_\_\_ Land Treatment
- \_\_\_\_\_ Bioremediation (or enhanced bioremediation)
- \_\_\_\_\_ Chemical oxidation
- \_\_\_\_\_ Other \_\_\_\_\_

## Groundwater Remediation Summary

- \_\_\_\_\_ Bioremediation ( or enhanced bioremediation )
- \_\_\_\_\_ Chemical oxidation
- \_\_\_\_\_ Air sparge / Soil vapor extraction
- \_\_\_\_\_ Natural Attenuation
- \_\_\_\_\_ Other \_\_\_\_\_

## GROUNDWATER MONITORING

If groundwater has been impacted, describe proposed monitoring plan, including # of wells or sample points, monitoring schedule, analytical methods, points of compliance. Attach a groundwater monitoring location diagram.

# REMEDIATION PROGRESS UPDATE

## PERIODIC REPORTING

Frequency:  Quarterly  Semi-Annually  Annually  Other \_\_\_\_\_  
Report Type:  Groundwater Monitoring  Land Treatment Progress Report  O&M Report  
 Other Vegetation monitoring \_\_\_\_\_

## WASTE DISPOSAL INFORMATION

Was E&P waste generated as part of this remediation? Yes \_\_\_\_\_

Describe beneficial use, if any, of E&P Waste derived from this remediation project:

Impacted soil

Volume of E&P Waste (solid) in cubic yards \_\_\_\_\_ 252

E&P waste (solid) description Impacted soils \_\_\_\_\_

COGCC Disposal Facility ID #, if applicable: \_\_\_\_\_

Non-COGCC Disposal Facility: Envirotech Landfarm \_\_\_\_\_

Volume of E&P Waste (liquid) in barrels \_\_\_\_\_ 0

E&P waste (liquid) description \_\_\_\_\_

COGCC Disposal Facility ID #, if applicable: \_\_\_\_\_

Non-COGCC Disposal Facility: \_\_\_\_\_

## REMEDIATION COMPLETION REPORT

### REMEDIATION COMPLETION SUMMARY

Is this a Final Closure Request for this Remediation Project? Yes \_\_\_\_\_

Do all soils meet Table 910-1 standards? Yes \_\_\_\_\_

Does the previous reply indicate consideration of background concentrations? Yes \_\_\_\_\_

Are the only residual soil impacts pH, SAR, or EC at depths greater than 3 feet below ground surface? \_\_\_\_\_

Does Groundwater meet Table 910-1 standards? Yes \_\_\_\_\_

Is additional groundwater monitoring to be conducted? \_\_\_\_\_

## RECLAMATION PLAN

### RECLAMATION PLANNING

Describe reclamation plan. Discuss existing and new grade recontouring; method and testing of compaction alleviation; and reseeding program, including location of new seed, seed mix and noxious weed prevention. Attach diagram or drawing.

The area of the water transfer line has been reclaimed. The area was contoured to pre-spill conditions, with the addition of water bars. The slope of the hillside was stabilized with matting and hydroseeded with a like and kind seed mix to mimic surrounding conditions. The area will be monitored to determine seed success and for weed infestation on a bi-annual frequency.

Is the described reclamation complete? Yes \_\_\_\_\_

Does the reclamation described herein constitute interim or final reclamation of the Oil and Gas Location?

Interim?  Final?

Did the Surface Owner approve the seed mix? Yes \_\_\_\_\_

If NO, does the seed mix comply with local soil conservation district recommendations? Yes \_\_\_\_\_

# IMPLEMENTATION SCHEDULE

## **PRIOR DATES**

Date of Surface Owner notification/consultation, if required. 11/16/2018

Actual Spill or Release date, if known. 11/03/2018

## **SITE INVESTIGATION DATES**

Date of Initial Actions described in Site Investigation Plan (start date). 11/06/2018

Date of commencement of Site Investigation. 11/06/2018

Date of completion of Site Investigation. \_\_\_\_\_

## **REMEDIAL ACTION DATES**

Date of commencement of Remediation. 11/12/2018

Date of completion of Remediation. \_\_\_\_\_

## **SITE RECLAMATION DATES**

Date of commencement of Reclamation. 12/12/2018

Date of completion of Reclamation. \_\_\_\_\_

**OPERATOR COMMENT**

Updating the Form 27 with March 2019 soil sample results, a summary of results, and a map of sample locations. All results are below 910 standards with the exception of arsenic which are in line with background levels.

355 gallons of biodegradable surfactant mixture (10 gallons water:1 gallon surfactant) was applied to the ditch in November. A map of the application is attached.

I hereby certify all statements made in this form are to the best of my knowledge true, correct, and complete.
