458834	SPILL OR RELEASE	AC	02/21/2019		-	Thomas Jacquez E1 PW Line	EI

General Comment:

On March 26, 2019 COGCC SW EPS Jim Hughes conducted a follow up environmental field inspection of the BP Thomas Jacquez E #1 PW Line Spill/Release Point ID #458834. This field inspection was performed to verify if REM #12660 had been completed.

Inspected Facilities

Facility ID: 458834 Type: SPILL OR API Number: - Status: AC Insp. Status: EI

Environmental

Spills/Releases:

Type of Spill: PRODUCED WATER

Estimated Spill Volume: _____

Comment: Oily residue was observed at the Citizen's Animas Ditch head gate structure near the inlet to the High Flume siphon. Pondered water at both ends of the siphon contained E and P waste. Impacted material and vegetation was observed along the High Flume siphon bypass.

Corrective Action: Control and contain spills/releases and clean up per Rule 906.a. Contact COGCC EPS staff.

Date: 03/28/2019

Reportable: YES

GPS: Lat 37.103723

Long -107.897424

Proximity to Surface Water: _____

Depth to Ground Water: _____

COGCC Comments

Comment	User	Date
<p>On March 26, 2019 COGCC SW EPS Jim Hughes conducted a follow up environmental field inspection of the BP Thomas Jacquez E #1 PW Line Spill/Release Point ID #458834. This field inspection was performed to verify if REM #12660 had been completed. COGCC staff met with a landowner whose property was impacted by the release. Oily residue was observed at the Citizen's Animas Ditch head gate structure near the inlet to the High Flume siphon. Pondered water at both ends of the siphon contained E and P waste. Impacted material and vegetation was observed along the High Flume siphon bypass. A follow up meeting with the landowner and a BP representative on 3/27/2019 delineated further actions required. The head gate structure at the High Flume siphon inlet shall be cleaned of all residue from Spill/Release Point ID #458834. The pooled water at the siphon inlet shall be removed with a vac truck. The remaining fluid in the siphon shall then be evacuated from the siphon outlet. Fluid volume removed and final disposition information shall be provided to COGCC Environmental staff, upon completion. Stained soil and vegetation shall be removed from the High Flume siphon bypass. Representative confirmation samples shall be collected to ensure compliance with Table 910-1. Samples shall be analyzed for any/all analytes that were above detection limits in the most recent sampling event. As stated previously as a condition of approval for Supplemental Form 27 Document #401973458, BP shall have equipment/personnel deployed when water is returned to the ditch system.</p>	hughesjo	03/27/2019
