General Comment:

This is an environmental follow up inspection to COGCC inspection 693900047. Any corrective actions from previous inspections that have not been performed are still required.

COGCC inspection 693900047 identified an environmental corrective action to stop leak at wellhead and a possible historic spill in cut bank next to wellhead. This follow up inspection found the free fluid from leaking wellhead to be removed but a new stuffing leak has developed. Operator shut in well upon arrival to begin repairs and fix leak.

Investigation into soils in cut bank did not find stained soil or a hydrocarbon odor in the soil in excavations 12 inches deep. Previous observations of possible hydrocarbon stained soil likely due to wet carbonaceous soils at the time of previous inspection.

Follow up inspection to document compliance with other corrective actions from inspection 693900047 still required.

LocationOverall Good: ☐

Emergency Contact Number:

Comment: Corrective Action: Date: Overall Good: ☐**Spills:**

Type	Area	Volume		
Crude Oil	WELLHEAD	<= 1 bbl		
Comment: Small leak from wellhead observed upon arrival. Operator shut in well to address leak.				
Corrective Action: 30 days to remove stained soil around wellhead.			Date:	04/23/2019

In Containment: No

Comment: ☐ Multiple Spills and Releases?**Venting:**
