Corrective Action:			

Overall Good:

Spills:

Type	Area	Volume			
Other	WELLHEAD	<= 1 bbl			
Comment:	While moving drilling rig (starting on 3/22/2019) some of the oil based mud tank was spilled due to mud at the location. About 3-5 bbls (may include snow melt) spilled on containment (plastic liner under rig) and ~1 bbl was recovered, including stained soils, off containment. Operator had vac truck on location on 3/27/2019 to remove OBM that left containment and also installed a berm to prevent further flow off containment (see attached photos) until area is dry enough to remove rest of OMB and liner that will be completed on 3/28/2019 per operator. Check for integrity of containment when removing it and remove any additional material if needed.				
Corrective Action:	For a spill - "Cleanup and properly treat or dispose in accordance with Rule 907.d.(2)." Forty-eight hrs to perform cleanup and 5 days to contact COGCC Area EPS.		Date:	03/29/2019	

In Containment: No

Comment: Per the Form 2A for this location: Estimated depth to ground water at Oil and Gas Location is 18 Feet. And: Basis for depth to groundwater and sensitive area determination: The nearest active water well as established by Colorado Division of Water Resources with associated depth to groundwater information is well number #41846-F located approximately 5200 ft to the west-northwest. Depth to groundwater is based on DWR permit #51506 located to the south of location. Contact COGCC EPS about these details.
