453889	SPILL OR RELEASE	AC	03/02/2018		-	Bruton 30-03	EI

General Comment:

COGCC Environmental Inspection of tank battery, conducted in response to verbal notification from the operator of a potential release inside of tank battery containment.

Tank battery consists of four (4) 400 bbl steel ASTs labeled to contain condensate/produced water, which are located inside of lined metal containment berm. On date of inspection, tank battery berm contained approximately 6-9 inches of fluids (water with hydrocarbon sheen and odor). See photos. No visible tears or holes were observed in visible portion of tank battery liner during inspection. No active source of the fluids observed inside of containment was determined by inspection.

Environmental**Spills/Releases:**

Type of Spill: OTHER E&P WASTE

Estimated Spill Volume: _____

Comment: Presence of fluid inside of tank battery containment likely explained by accumulation of snowmelt. Fluids constitute oily waste, due to presence of hydrocarbon odor and sheen. See photos.

Corrective Action: Remove and properly dispose of oily waste, per Rule 907.e. Submit information regarding final disposition of fluids to the COGCC via a Field Inspection Report Response form. If fluids are determined to be the result of a spill or release from the production facility, submit an eForm 19 Spill Report per Rule 906.b.

Spill/Remediation:

Comment: Spill ID #453889 remains active for the subject facility. Supplemental eForm 19 received 2/21/2018 (doc #401549719) includes the following COGCC comment: "Benzene concentration is above Table 910-1 on sample 30-03-SS1 (0.29 mg/kg). The request for closure box was unchecked. Another round of samples is required to confirm compliance with Table 910-1. 3 samples, including one at the center of the spilled area is suggested." Remediation Project #11230 was approved to address impacts. Operator has not provided any project updates after Initial F27 (doc #401606653) was approved on 4/17/2018.

Corrective Action: Submit an update for Spill #453889 via an eForm 19 Supplemental Report. Operator may include a closure request indicating that work was proceeding under approved Remediation Project #11230. Submit an eForm 27 Supplemental Report to provide a project status update and additional documentation for Remediation Project #11230.
