**General Comment:**

On 3/11/2019 COGCC Environmental staff inspected Hebron 2-07 (057-06499) location and Remediation Number 10183. Weather was 34 degs and overcast, snow covered most of the location and access road. It was reported on the Form 27 that monitoring wells were installed as 1" pvc, only one well was observable (seen in attached photo). Sandridge should assure that the wells are not allowing any fluid from the surface to the subsurface. Remediation project communication will continue on the Form 27 and email. Well was Shut-In at time of inspection.
