

## **Waste Management Plan Summary for Cub Creek Energy, LLC**

Cub Creek Energy, LLC (CCE) plan for the appropriate handling of produced water, drill mud and cuttings, tank bottoms, and other associated Exploration and Production (E & P) wastes is described below:

- E&P wastes onsite will be stored in compatible containers or containment devices designed or engineered for the purposes for which they will be utilized. These containers will be inspected on a regular basis to ensure that no undue wear, structural issues, severe rust, other defects, which may impact their effectiveness.
- E&P wastes will be transported offsite via truck by a licensed transporter. Frequency of these operations will vary by site based on waste volumes.
- Any soils contaminated by E&P waste and the 40mil plastic liner with a textile underlayment will be disposed of by a licensed third-party disposal facility. Tank bottoms will be disposed of at licensed third-party offsite commercial disposal facilities. Liquid wastes such as flow-back fluid and produced water will be disposed of at licensed third-party injection facilities such as those run by NGL Water Solutions DJ, LLC.
- Drilling wastes, such as drill cuttings and bentonitic drilling fluids will be disposed of at licensed Commercial Disposal Facilities. No other E&P wastes will be disposed of at these sites. Drilling Rig will use a closed loop system.
