Fluid(s) Spilled/Released (please answer Yes/No):

Was one (1) barrel or more spilled outside of berms or secondary containment? No
Secondary containment, **including walls & floor regardless of construction material**, must be sufficiently impervious to contain any discharge from primary containment until cleanup occurs.

Were Five (5) barrels or more spilled? Yes

Current Land Use: NON-CROP LAND Other(Specify):

Weather Condition: 40 degrees F.

Surface Owner: FEE Other(Specify):

Check if impacted or threatened by spill/Release (please answer Yes/No to all that apply):

Waters of the State ☐ Residence/Occupied Structure ☐ Livestock ☐ Public Byway ☐ Surface Water Supply Area ☐

As defined in COGCC 100-Series Rules

Describe what is known about the spill/release event (what happened -- including how it was stopped, contained, and recovered):

On March 9, 2014, approximately 30 barrels of condensate were released inside secondary containment at the Sarchet 41-23, Sarchet UPRR 42-23 3X production facility when a motor valve seat and trim failed at the wellhead. Approximately 25 barrels of condensate were recovered via vacuum truck and transferred to a licensed injection facility for disposal. Excavation activities were guided in the field by screening soil for volatile organic compound (VOC) concentrations using a photoionization detector (PID). A topographic Site Location Map showing the geographic setting of the release is provided as Figure 1.

General Comments**User Group****Comment****Comment Date**

Agency	Based on review of the information submitted in project 12741, it appears that the proposed investigation activities and proposed remedial actions in the approved site investigation and remediation plan were adequate to remediate impacted soils at the site of the spill. However, should future conditions at the site indicate contaminant concentrations in soils exceeding COGCC standards or if ground water is found to be significantly impacted, further investigation and/or remediation activities may be required at the site.	04/05/2019
