COMMENTS:

Bonanza Creek respectfully requests continued TA status. The Antelope 11-18 was plugged back with a CIBP @ 6200' and 2 sacks of cement on 10/1/2018. Form 5A to report TA status of Nio/Codell was submitted 1/8/2019 (Doc # 401895995); the well was SI and plugged back due to offset HZ frac of Bonanza Creek's Antelope T-19 Pad. The well is closed to the atmosphere locked out and tagged out at the master valve, and the a "Temporary SI for HZ prep" sign is attached to the master valve. Well pressure tested to 1000psi, held pressure for 20 minutes, test was good. This is being evaluated as a potential gas injection well for a future Bonanza Creek gas injection project, therefore are requesting continued TA status until such time. An annual TA sundry will be submitted in 2020 to update the COGCC of this well's status.

CASING AND CEMENTING CHANGES

H2S REPORTING

Data Fields in this section are intended to document Sample and Location Data associated with the collection of a Gas Sample that is submitted for Laboratory Analysis.

Gas Analysis Report must be attached.

H2S Concentration: _____ in ppm (parts per million) Date of Measurement or Sample Collection _____

Description of Sample Point:

Absolute Open Flow Potential _____ in CFPD (cubic feet per day)

Description of Release Potential and Duration (If flow is not open to the atmosphere, identify the duration in which the container or pipeline would likely be opened for servicing operations.):

Distance to nearest occupied residence, school, church, park, school bus stop, place of business, or other areas where the public could reasonably be expected to frequent: _____

Distance to nearest Federal, State, County, or municipal road or highway owned and principally maintained for public use: _____
