## SOURCE REMOVAL SUMMARY

Describe how source is to be removed.

Produced Water Storage Tank was removed. Hydrocarbon bearing soil was removed by truck and sent for disposal.

## REMEDIATION SUMMARY

Describe how remediation of existing impacts to soil and groundwater is to be accomplished (i.e. summarize remedial action plan). Provide a brief narrative description including: technical justification, schedule for implementation, estimated time to attain NFA status, plus plans and specifications for the selected remedial action technology.

PW tank was removed and soil samples have been collected and analytical shows they are under Table 910. Equipment at the Tank Battery was removed and the well was P&A'd. Initial samples were collected and a high TPH soil sample (2518 mg/kg) was observed at the SS-02 location. Hydrocarbon bearing soil was removed and additional sampling was conducted. All samples are below Table 910 threshold.
