### DESCRIPTION OF IMPACT

Impacted?	Impacted Media	Extent of Impact	How Determined
UNDETERMINED	SOILS	No impacts at this time	Will be determined by laboratory analytical results

### INITIAL ACTION SUMMARY

Description of initial action or emergency response measures taken to abate, investigate, and/or remediate impacts associated with E&P Waste.

Advance a soil boring at the center of the former partially-buried produced water vessel to approximately 10 feet below ground surface (bgs).

### PROPOSED SAMPLING PLAN

#### Proposed Soil Sampling

☒ Will soil samples be collected as part of this investigation? ( Number, type (grab/composite), analyses, and locations of samples ):

Soil samples will be collected continuously with a standard 2-inch diameter, 5-foot long, stainless steel sampler with clear acetate liners to approximately 10 feet bgs. If the photoionization (PID) reading observed within the terminal sample interval (7.5 to 10 feet bgs) is below 100 ppm-v the soil boring will not be advanced any deeper and the soil sample exhibiting the highest PID reading detected above groundwater saturation (if encountered) will be submitted for laboratory analysis. The selected soil sample will be submitted for laboratory analysis of BTEX, TPH-GRO, and TPH-DRO. If elevated PID readings (100 ppm-v or greater) are observed within the terminal sample interval (7.5 to 10 feet bgs) sample interval, the soil boring will be advanced further until the soil boring is vertically defined to below 100 ppm-v or until groundwater is encountered.

#### Proposed Groundwater Sampling

☒ Will groundwater samples be collected as part of this investigation? ( Number, analyses, and locations of samples ):

If groundwater is encountered during soil boring advancement activities, a 1" polyvinyl chloride (PVC) temporary monitoring well will be installed and a groundwater sample will be collected. The groundwater sample will be submitted for laboratory analysis of BTEX.

#### Proposed Surface Water Sampling

☐ Will surface water samples be collected as part of this investigation? ( Number, analyses, and locations of samples ):
