Comment: Temporary BMPs have been installed (ditch and berm) around the entire perimeter of the location. More permanent BMPs should be installed upon the completion of pad construction. An unconsolidated berm BMP is not a proper functioning BMP. Operator indicated that the berm would be stabilized the day of this inspection. Operator has plans to install sediment traps.

BMPs shall be selected based on site-specific conditions, such as slope, soil type, vegetation cover, and proximity to water bodies, and may include maintaining in-place some or all of the construction BMPs until the Location is abandoned and final reclamation is achieved pursuant to Rule 1004. BMPs shall be installed in accordance with good engineering practices.
