[COGCC Inspection Report Summary.](#)

On 4/26/2019 at approximately 12:00, inspector Rick Moran, conducted a follow up inspection at Merrion Oil & Gas's well Baxter Pass 43-21 in Rio Blanco county.

While there I conducted a follow up inspection of FIR document 679701950 and FIRR document 401896339 along with a routine well inspection.

During this inspection the following corrective actions were identified as resolved:

- 1) Small tank label.
- 2) Well head gas leak.
- 3) Public road on sign.
- 4) Barrels without labels removed from location.

During this inspection corrective actions were identified:

- 1) "911" missing from battery sign. (Public road label appears to be faded).
- 2) Uncapped riser between pit & meter building.
- 3) Capacity on 300 bbl tanks not legible.
- 4) Missing well head sign.
- 5) Dead weeds on tank battery berm.

Note the signage is facing south leading to labeling with markers to fade from the sun.

A follow up on this site inspection will be conducted to ensure the compliance issues have been corrected to comply with COGCC rules.

This is a summary of inspection report 679703878.
