COMMENTS:

Noble Energy respectfully requests continued TA status. The well is closed to the atmosphere via a CIBP set at 6612' on 3/22/2017. The well is closed to the atmosphere and locked out and tagged out at the master valve. The well was completed in the Niobrara-Codell formation. This well was TA'd for an off-set frac, Noble's Lapp Pad and is part of Noble's alternative MIT program. Noble will return the well to production or plug and abandon before the next MIT is due. Noble is currently working through a large back log of P&A work for offset mitigation work for DJ basin activity. Form 5A to change the status to TA was submitted on doc #401291873. Initial pressure test attached. This well is tagged with a yellow tag.
