COMMENTS:

New compressors were recently installed at this location by our Midstream partner, which are at this time fully operational. While our midstream partner is in the process of constructing and tying in a centralized production facility, there may be concerns of the compressor going down at unknown times/intervals. If this were to occur, gas from the producing wells on this pad would need to be flared, as the line pressure would be too high to send gas to sales. The centralized production facility is scheduled to be completed by August 2019. This sundry is being submitted to serve as a notice per the request of Stuart Ellsworth should flaring have to occur under upset conditions during this time.

H2S REPORTING

Data Fields in this section are intended to document Sample and Location Data associated with the collection of a Gas Sample that is submitted for Laboratory Analysis.

Gas Analysis Report must be attached.

H2S Concentration: _____ in ppm (parts per million) Date of Measurement or Sample Collection _____

Description of Sample Point:

Absolute Open Flow Potential _____ in CFPD (cubic feet per day)

Description of Release Potential and Duration (If flow is not open to the atmosphere, identify the duration in which the container or pipeline would likely be opened for servicing operations.):

Distance to nearest occupied residence, school, church, park, school bus stop, place of business, or other areas where the public could reasonably be expected to frequent: _____

Distance to nearest Federal, State, County, or municipal road or highway owned and principally maintained for public use: _____
