Storm Water:

Loc Erosion BMPs	BMP Maintenance	Lease Road Erosion BMPs	Lease BMP Maintenance	Chemical BMPs	Chemical BMP Maintenance	Comment
<p>Comment: Cobble and wattles are placed in erosional features identified during the 2016 reclamation inspection. These were not adequate to control the erosion and are not maintained, so that erosion is continuing within the western and eastern project areas.</p>						Date: 05/31/2019
<p>Corrective Action: This is the second corrective action for stormwater erosion within the project area. Stormwater controls need to be installed to stabilize erosion within the project area. These need to be selected and installed using good engineering practices such as those described by CDOT in their erosion control and stormwater quality guides.</p>						
<p>Pits: <input checked="" type="checkbox"/> NO SURFACE INDICATION OF PIT</p>
