Site Investigation and Remediation Workplan (Supplemental Form)

This form shall be submitted to the Director for approval prior to the initiation of site investigation and remediation activities. However, this shall not preclude the Operator from taking immediate action to protect public health or safety, the environment, wildlife, or livestock.

This Form 27 describes site conditions as currently understood by the Operator; approval of this Form 27 by COGCC is based on the site conditions accurately described herein; any changes in site conditions identified during or subsequent to the performance of the approved workplan may necessitate additional investigation or remediation which shall be described on a supplemental Form 27. This Form 27 is intended to provide basic information regarding the proposed site investigation and remediation actions, but the workplan may be more fully described in attached documentation.

Refer to Rules 340, 905, 906, 907, 908, 909, and 910

PROPOSED SAMPLING PLAN

Proposed Soil Sampling

☒ Will soil samples be collected as part of this investigation? (Number, type (grab/composite), analyses, and locations of samples):

Wesco has taken soil samples at varying depths in the North and South end of the pit. Wesco has sample results showing compliance with 910-1 table concentrations below the top 2 feet of contaminated material. Wesco will remove the top 2 feet of material before hauling in clean material to fill the pit. Wesco requests no further BTEX, Metals, or organic compound sampling in an amended plan. See attached analysis and previously attached analysis.

OPERATOR COMMENT

Wesco Operating is submitting this supplemental Form 27 at the request of Alex Fischer. Wesco proposes a tentative remediation start date of July 1, 2019. This will hopefully allow time for snow and spring runoff to dissipate. This supplemental Form 27 is an addititious document of a previously submitted and approved Form 27 (COGCC Doc. #401799195), as well as the Form 4 (COGCC Doc. #401987167) that was requested by Kris Neidel. As long as weather permits, Wesco will coordinate with Reclamation Specialist Lou Colby when remediation/reclamation work is about to begin. Additional information, along with soils sample results, can be found in the documents previously submitted to COGCC by Wesco.

I hereby certify all statements made in this form are to the best of my knowledge true, correct, and complete.
