 Inspection Document # 688402182/688402184

Nature of Complaint: odor/lighting/ and noise
 Field Inspector Actions:
 On 05-14-2019, I was contacted by COGCC staff about a complaint received by the COGCC in reference to Odor, lighting and noise. The complainant stated the issues were occurring outside of his home.
 On 05-14-2019, I attempted to make contact with the complaint who indicated for several month we have patiently dealt with the unbearable sound, rumble, light and horrible odor. The fumes are so extreme that we cannot even be outside. We have not heard how long this process will take and we cannot handle these conditions any longer. What are the fumes? I performed an onsite inspection of both drilling locations in close proximity to complainant's neighborhood, Buddy and Ranger locations. I spoke to both drilling managers on site (Carlton Cooley and Sean Giddings) on complaint issues. We addressed as follows. Odors: I asked managers if they were using odorant with the drill cuttings they informed me they were not but they would start adding odorant to their mud system to see if they can reduce odor. Lighting: both managers assured me the would have an employee drive out to the adjacent neighborhood and see if they can see witch lights need to be redirected. Noise: Spoke with both managers about reducing the amount of noise during nighttime operations they informed me they would speak with rig crew and reduce noise. At time of inspection inspector did not observe any of the issues related to the complaint. No corrective actions relating to the complaint were issued at this time. However inspector observed other corrective, actions at time of inspection please see full inspections.
 See inspection document #688402182/688402184 per my inspections.
 All information reviewed and site inspection information were submitted to the COGCC for further review.
