General Comment:

This is a follow-up interim reclamation and stormwater inspection to doc. #696200038 and #696200047.

Inspection documented a fluid spill and stained soils at well head.

This inspection is to document compliance for the following corrective actions:

906.a: Control/contain fluid spill and clean up stained soils at wellhead

902.c: Remove hydrocarbons from drill pit

1003: Interim reclamation

A follow up on this site inspection will be conducted to ensure the compliance issues have been corrected to comply with COGCC rules.

Any corrective action(s) from previous inspections that have not been addressed are still applicable.

Overall Good: ☐**Spills:**

Type	Area	Volume		
Comment:	Previous inspection documented hydrocarbons within the drill pit. Previous inspection documented contractor on location removing material from the pit. Drilling pit has been closed.			
Corrective Action:				Date:
	WELLHEAD			
Comment:	Previous inspection documented a fluid spill at the wellhead. Operator appears to have controlled/contained the fluid spill at the well head. Stained soils appear to have been cleaned up. It is noted that previous inspections also required operator to contact NE EPS Rob Young per the corrective action matrix. EPS Young has stated to Reclamation Specialist Trujillo that he has not been contacted by Operator regarding issues.

Comment

Previous inspection required operator to "Comply with COGCC 1003 Interim Reclamation Rules including, but not limited to, compaction alleviation per 1003.c, close drill pit per 1003.d, and establish vegetation".

Operator appears to have replaced the segregated soils/topsoil over the location, however, compaction zones were discovered directly under the recently replaced topsoil; Unable to find evidence that compaction alleviation has been conducted in the interim areas in accordance with 1003.c.

Corrective action remains applicable until reclamation has been conducted in accordance with COGCC Reclamation rules and requirements.

Corrective Action

Comply with COGCC 1003 Interim Reclamation Rules including, but not limited to, compaction alleviation per 1003.c, and establish vegetation with total perennial, non-invasive uniform plant cover of at least eighty (80) percent of predisturbance or reference area levels. Use a seed mixture requested by the surface owner, or a mixture prescribed by the local county NRCS. Ensure erosion controls are implemented to stabilize the seeded soil, and continue to monitor and manage this location until reclamation has passed.
