Latitude: 38.427729 Longitude: -103.013502

CORRECTIVE ACTIONS:

2 CA# 125201

Corrective Action: Securely fasten all valves, pipes, and fittings to ensure good mechanical condition, inspect at regular intervals and maintain in good mechanical condition per Rule 605.d.

Date: 05/17/2019

Response: CA COMPLETED

Date of Completion: 05/17/2019

Operator Comment: Pumpers were notified that a leak at water tank had occurred at the Salt lake Water Disposal Site. Pumpers inspected immediately. Water had been hauled earlier from this water tank due to the water disposal well for the field being shut-in due to a suspected hole in the tubing discovered when an pre-MIT test was conducted (Helfrich #1, water injection well for Salt Lake Field, is currently being worked on to pull tubing). Water truck had not completely shut valve, so there was a minor water drip. All valves were inspected by pumpers and secured closed. Plug installed in valve.

COGCC Decision: _____

COGCC

OPERATOR COMMENT AND SUBMITTAL

Comment: Pumpers responded immediately to call from COGCC regarding a water leak at the Salt Lake Field Water Disposal Site. Water had been recently hauled off this particular water tank as the water disposal well, Helfrich #1, was shut-in due to a suspected tubing leak discovered during a pre-MIT test. Valve had not been completely closed after pulling water, resulting in a minor water drip. Valve was secured. All valves inspected and secured. Plug installed in valve.

I hereby certify that the statements made in this form are, to the best of my knowledge, true, correct, and complete.
