

Project Summary – Blood Spring

Document No.: 2145667

Remediation No: 7913

The skim pit was excavated in June 2013.

Z and S Construction Co. completed the work and transported four (4) loads of soil totaling 84 tons to Waste Management's Buffalo Ridge Facility

Background Samples were taken June 25, 2013 and Confirmation samples were taken in September of 2013. Sample analytical values were below Table 910 standards.

All pits were backfilled in the fall of 2013.

The area was re-contoured and natural re-vegetation occurred.

Re work and reseedling of small areas may be required in subsequent years.
