General Comment:

This is an Abandoned Location Inspection for Four Wells listed in Inspected Facilities above. APDs were first Approved in 2008 for Antero; Conductors plugged 2/21/18; Permits Abandoned 3/14/18 by Ursa. Though reports verify that Conductors were Plugged & Abandoned there is evidence of Wells; grated Cellars & capped Conductors (at ground level) are visible on three of the Wells. Well #045-16046 has grated Cellar in place though capped Conductor is not visible. It does not appear that these AL Wells were drilled on Location with Four PR Wells; therefore, these would be Well Releases on an Active Location, if not for Evidence of Wells remaining on Site.
