Location and associated production facilities reclaimed Pass Locations, facilities, roads, recontoured Pass

Compaction alleviation Pass Dust and erosion control Pass

Non cropland: Revegetated 80% In Cropland: perennial forage _____

Weeds present In Process Subsidence Pass

1004.d. FINAL VEGETATION TRANSECT

TRANSECT RESULTS OF DISTURBED AREA% _____

TRANSECT RESULTS OF REFERENCE AREA% _____

TOTAL % OF DESIRABLE VEGETATION COVER _____

VEGETATIVE COVER _____

Comment: The utility box has been removed since previous inspection. There are areas of the location that were recently seeded and straw mulched. Other areas appear to have been interseeded. There are areas with predominately undesirable weeds. These areas were interseeded which may help control the weeds. Other areas of the location are establishing desirable vegetation well. Continue to monitor and manage the location until the reclamation requirements are achieved. See Attached Photos.
